The CAMES Surgical Simulation Masterclass is designed to teach leaders and medical educators how to develop, implement, and run an evidence-based simulation program for surgical training. Based on solid theoretical frameworks, the intensive one-week masterclass will have a practical focus on the use of effective and evidence-based teaching methods that allow participants to directly implement the learned skills in their own context.

LEARN HOW TO

- Design a curriculum that includes: general and targeted needs assessment; goals and objectives; teaching and learning methods; implementation plans; structured evaluation
- Develop dedicated custom-built training models
- Use effective and evidence-based teaching methods for surgical training and simulation-based certification (mastery learning)
- Plan and conduct research studies regarding surgical simulation

The CAMES Surgical Simulation Masterclass consists of intensive lectures, group discussions, workshops, and hands-on train-the-trainer courses with phantoms, virtual-reality simulators, and live animals. Number of participants is limited.

Apply online at
www.camesmasterclass.com

WHO CAN APPLY?

Surgeons with responsibilities in education, Simulation Centre Faculty, Medical Educators, and Course Directors.

COURSE FEE: 3,000 EUR

APPLICATION DEADLINE: 15 December 2017

CAMES is a world leading simulation and research center with more than 50 evidence-based, mastery-learning training programs and more than 60 scientific publications annually.
