

Udskriv til folder.

Vælg filer, udskriv

The screenshot shows the Windows Print dialog box for a printer named '\\RGHWINPRN18\RH-PRDIA0118'. The 'Printer' dropdown is set to this printer. The 'Kopier' (Copies) field is set to 1. The 'Udskriv i gråtoner (sort-hvid)' (Print in grayscale) and 'Spar blæk/toner' (Save ink/toner) checkboxes are unchecked. Under 'Sider, der skal udskrives' (Pages to print), the 'Alle' (All) radio button is selected. The 'Tilpasning af sidestørrelse og sidehåndtering' (Page size and handling) section has the 'Hæfte' (Staple) button selected. The 'Undersæts hæfte' (Staple) dropdown is set to 'Begge sider' (Both sides). The 'Ark fra' (Page from) field is set to 1 and 'til' (to) field is set to 3. The 'Binding' (Binding) dropdown is set to 'Venstre (Høj)' (Left (High)). Under 'Retning' (Orientation), the 'Stående' (Portrait) radio button is selected. The 'Udskriv' (Print) button at the bottom right is highlighted with a red circle. The preview area shows a document page with the title 'Behandling med blodkomponenter ved blødning' and a page number 'Side 1 af 6 (1)'. The 'Udskriv' button is also highlighted with a red circle.
