

evRoaming4EU

Realising cross-border charging in Europe

The Capital Region of Denmark and E.ON are proud to invite you to the Copenhagen Zoo on 18 September to be part of 'Roaming for seamless cross-border charging'

The road to seamless cross-border charging is a bumpy yet exciting one, and you are invited along for the ride! September 18 will be the Danish kick-off of a new European project connecting various pilots and projects in multiple countries to provide transparent information about charging in Europe through the use of the open, independent OCPI protocol. Local and international partners, suppliers, and EV drivers are welcome to contribute to the project and share knowledge and experiences. The project's ultimate goal is to enable all EV drivers to charge hassle-free anywhere in the EU.

The programme

9:30 Coffee & Registration
10:00 Start of plenary session

- *Welcome by Jan E. Jørgensen*, Member of the Danish Parliament and 1st Deputy Mayor of the Municipality of Frederiksberg
- *Presentation of evRoaming4EU and introduction to roaming*

If you have not registered yet, [please do so here](#). Limited seats are available.

We look forward to meeting you.

Best regards,

The kick-off will be moderated by journalist and former TV-Host, Nynne Bjerre Christensen

ABOUT THE PROJECT

This project is a collaborative partnership between four countries (Denmark, Germany, Austria and the Netherlands) to facilitate roaming services and provide transparent information about charging in Europe through the use of the open

independent OCPI protocol. Local and international partners, suppliers and EV drivers are welcome to contribute to the project and share knowledge and experiences. The project's ultimate goal is to enable all EV drivers to charge hassle-free

anywhere in the EU. The Danish partners of evRoaming4EU are E.ON Denmark and CPH-Electric, the Capital Region of Denmark.
